Bareilly, UP 243001

SKILLS

- React
- Node.js
- Express.js
- MongoDB
- JavaScript
- HTML
- CSS
- Tailwind CSS
- Website development
- Android Development
- Team Collaboration

HOBBIES AND INTERESTS

Sports -

- Football (striker)
- Badminton (attacker)

ACCOMPLISHMENTS AND AWARDS

- Won 7 hackathons using a LoRaMesh communication system.
- Developed an AI-based CPR patch device, and serve as CTO of Tallow and Care

TOOLS AND TECHNOLOGIES

Frontend: React.js, HTML, CSS, Tailwind CSS, JavaScript

Backend: Node.js, Express.js, MongoDB, REST APIs

Deployment: Vercel, Render, Git, GitHub

Hardware: ESP32-C3, Arduino Nano, LoRa Modules, ECG Sensor, Gear Motor, Motion Sensors

EDUCATION

01/2027

Bachelor of Technology Information Technology

SHri Ram Murti Smarak College of Engineering & Technology - Bareilly, UP

- Coursework includes Data Structures, Web Technologies, Computer Networks, Database Management Systems, and Embedded Systems.
- Active participant in technical hackathons and IoT-based hardware development projects

SUMMARY

Aspiring Information Technology undergraduate with a Bachelor of Technology, passionate about leveraging technology to enhance user experience. Strong foundation in web development and backend systems, eager to learn from real-world challenges and contribute to innovative projects. Committed to collaborating with diverse teams and adapting skills to meet dynamic project needs. Currently serving as Chief Technology Officer at Tallow and Care, building and deploying real products for real customers.

EXPERIENCE

01/2024

Current

Chief Technology Officer-

<https://github.com/valeed910/Tallow-and-Care-official>

Tallow and Care Private Limited - Bareilly, Uttar Pradesh, India

- Guided tech direction to streamline operations and enhance user experience.
- Developed comprehensive website for eco-friendly animal care products, boosting online visibility.
- Developed website and backend systems to support business growth and enhance customer engagement.
- Oversaw architecture and deployment strategy, managing the company's full technology stack end to end.
- Collaborated with cross-functional teams to align technical execution with strategic business objectives.
- Integrated Resend API for automated email handling and Cloudflare Turnstile for bot protection on forms.
- Managed MongoDB database and handled ongoing product updates and technical improvements independently.

PROJECTS

LoRaMesh Communication System -

<https://github.com/valeed910/Emergency-Communication-Network>

- A communication system using LoRa technology. Built a system allowing devices to communicate wirelessly over long distances. Designed for emergencies or remote areas.
- Hardware used: ESP32-C3 microcontroller and LoRa modules. Won 7 national-level hackathons with this system.

AI-Based CPR Patch Device -

<https://github.com/valeed910/AI-Powered-Automated-CPR-Vest>

- AI-based device for CPR assistance. Designed a wearable device assisting with CPR compressions in emergencies. Compact and user-friendly design.
- Hardware: Arduino Nano, ECG sensor, and gear motor. Awarded at a national hackathon for medical hardware innovation.

Tallow and Care - Website Development -

<https://github.com/valeed910/Tallow-and-Care-official>

- Developed and deployed a responsive website for an eco-friendly animal care startup using React.js
- Full deployment pipeline: frontend on Vercel, backend on Render, MongoDB as database, with email and security integrations.
